

When is it time to consider replacing your heating system or water heater?

It may be time to call a professional contractor to make a change if:

1 Your furnace, boiler or water heating system is more than 15 years old.

Consider replacing your existing heating system or water heater with one that's ENERGY STAR qualified, which is 15% more efficient than a conventional furnace or water heater or 5% more efficient than a new, standard boiler model.

2 Your equipment needs frequent repairs and your energy bills are going up.

Your equipment may have become less efficient.

3 Your existing system is noisy.

You could have a problem with the indoor coil of your cooling equipment.

Every home needs a hero.
And every hero can use a rebate.

Receive an instant rebate from Columbia Gas of Ohio for replacing an existing appliance with a qualifying ENERGY STAR® certified appliance in your home.

Available Rebates

\$300

Instant rebate for an ENERGY STAR certified 96%+ efficient natural gas furnace.

\$100

Instant rebate for an ENERGY STAR certified tankless water heating system with an Energy Factor of 0.91+

\$350
